Notes

Order book business

Order and quote charges

¹ Non-persistent orders

An order with a Time in Force that prevents it residing on the order book is considered to be a non-persistent order:

- IOC - Immediate or Cancel
- FOK - Fill or Kill

² Order and quote management surcharge

The order and quote management surcharge ("surcharge") applies, in addition to any applicable order management charge, to each order or quote event (entry, modification and deletion) ("event") in excess of the applicable figure in the table below. The surcharge is assessed separately for each member firm in each segment on a daily basis, with the exception of ETFs (segments ETFs, ETF2, ETFU, EUE2, EUET, IECF and IECR) and ETPs (segments ETCS, ETC2 and ETCU) which are assessed for each member firm in each product group (i.e. ETFs or ETPs) on a daily basis.

Security	Number of events per trade permitted before surcharge payable
FTSE 100 Index securities, FTSE 250 Index securities, Exchange Traded Funds and Exchange Traded Products	500 per electronic trade (automatically executed trades during continuous trading and auctions)
EQS securities	500 per reported trade
All other securities	No surcharge

The number of events permitted (by reference to the table above) will be aggregated on a daily basis, and the surcharge will be payable for each event which exceeds that aggregate. For example, if 10 trades are made in a day, the aggregate number of events permitted before the surcharge becomes payable, is 5000. If no trades are made on any day, the number of events permitted before a surcharge is payable shall be 500. Events and trades generated by Cross Orders and BTF are excluded from the application of the surcharge.

Entries, modifications and deletions of Executable Quotes in FTSE 100 Index and Firm Quotes in EQS securities in excess of 100 per registered security will be added to the number of order events made in a day when assessing the surcharge. Any other Registered Market Maker quotes do not attract a surcharge. For example, if a Registered Market Maker in 6 EQS securities uses 675 quote updates per day, only 75 events will be added to the number of order events when assessing the surcharge.

To qualify for the reduced high usage surcharge available: for ETFs order book trading by the member firm must exceed £500 million by value or 10% of the order book value traded, for ETPs order book trading by the member firm must exceed £300 million by value or 10% of the order book value traded.

³ Securitised Derivatives quote management charge

An alternative charging model for Securitised Derivatives is available on application and is charged at £10,000 per 100 messages per second per month.

Exchange charge

⁴ The charge for each order executed in part or in full, without reference to the number of executions incurred. Where an order

executes over multiple days a charge will apply on each day it executes.

For the application of the exchange charge, the securities are classified as:

- Equities (segments: AMSM, ASQ1, ASQ2, ASX1, ASX2, ASXN, HGS1, HGS2, HGS3, SET0, SET1, SET2, SET3, SFM1, SFM2, SFM3, SFM4, SSMM, SSMU, SSQ3, SSX3, SSX4, STMM)

⁵ Standard Value Traded Schemes

The charge for each order executed is by reference to the cumulative value traded on the order book by the member firm in the current billing period. Each order execution will be charged in accordance with the banded structure set out in this document, subject to the minimum execution charge. This tariff shall not apply to the following types of trading (although this trading still contributes towards cumulative value traded for purposes of each Standard Value Traded Scheme):

- aggressive flow that qualifies under the Liquidity Takers Scheme Packages under note 7 (Equities and IOB)

- orders executed by a registered market maker in a Smaller Company under note 9 (Equities and IOB)
- orders executed by a registered market maker in ETF/ETP under note 11

This tariff does not apply nor will volume generated count towards cumulative value traded for all Nominated Client (as defined in note 6) flow. Until 30 October 2015, Cross Orders and BTF executions will not contribute towards cumulative value traded for purposes of ETF/ETP Standard Value Traded Scheme.

⁶ Passive executions qualifying under Liquidity Provider Scheme for FTSE 350 securities and under Liquidity Provider Scheme for FESE Table 1 IOB Securities.

Member firms may apply for up to 4 trader groups or 4 groups of UserIDs or 4 TraderIDs (as appropriate) to be included within each scheme for use in relation to flow solely generated from the firm's own capital with no related client orders ("Proprietary Flow"). Any flow generated by the Nominated Client shall not be taken into account in determining the Proprietary Flow.

Member firms may also apply for a trader group or UserIDs (as appropriate) to be included within each scheme for use in relation to flow solely generated from an end-user client which is not a member firm ("Nominated Client") as identified in the relevant declaration. A separate trader group or UserIDs must be designated in a separate declaration for each Nominated Client and for each scheme. Where a Nominated Client is no longer to be included in the relevant scheme, the Exchange must be notified before the start of a month otherwise the member firm will be charged the monthly fee for that month. Fees relating to Nominated Clients are payable by the member firm.

If no package is selected, member firms will be charged based on the relevant Standard Value Traded Scheme for the particular security traded. Whilst Hidden orders are excluded from the scheme, any part of an Iceberg order that executes immediately on entry to the order book will be included in this scheme.
